

Denplan Care Fee Rates 2020/21

We have been working hard to try to provide the best service we can to our Denplan patients that we are allowed to deliver at any given time. Over the shutdown period our practice remained open and staffed providing dental telephone consultations and since then we have worked hard to increase our capacity to provide face to face care and also to expand our range of treatments we can provide, aerosol generating and non-aerosol generating.

We have discussed our situation with Denplan and although the situation is constantly evolving there is currently no plan to cancel, suspend or refund member's payments.

The theory behind a care scheme such as this is to spread the cost of dental payments out over the course of the year into smaller affordable payments, please be assured that although we have been forced to postpone some routine appointments in the short term we are working hard to catch up with and prioritise Denplan patients, and any treatment needed will remain covered under your scheme as normal.

Denplan fees will be frozen for 2021 and there will not be the usual annual fee increase.

All dental practices are facing fewer patients, higher costs and will all struggle to meet the increasing demands for dental care within the UK. The rise in PPE costs alone has been more than significant and all private dental practices in the UK have been put at risk.
